

J2EE构架与程序设计

Instructor's information

- Name : Zhenyan Ji
- Office: YF809B
- Email: zhyji@bjtu.edu.cn
- Telephone: 51687348(office)
13621070959(mobile)

Course Objectives

- Learn J2EE concepts and architecture
 - With Web-tier programming focus
- Learn core J2EE technologies
 - Servlet, JSP, JDBC, MVC
- Learn popular technologies for building enterprise applications
 - Struts, Hibernate framework
- Learn how to use IDE
 - NetBeans IDE 5.5

Prerequisites

- Java programming experience
- Some basic understanding on XML
- Some basic understanding on HTML
- Some basic understanding on network programming

Textbooks & Reference Materials

- We don't have any official textbook for this course
- We will use online materials whenever we can
- Major course reference materials
 - J2EE 1.4 (or Java EE 5) Tutorial from java.sun.com

Textbooks & Reference Materials

- 1、The Java EE 5 Tutorial,
<http://java.sun.com/javaee/5/docs/tutorial/doc/>
- 2、李刚编著, 《轻量级Java EE企业应用实战——Struts 2+Spring+Hibernate整合开发》, ISBN: 978-7-121-07471-4, 电子工业出版社。

Presentation Materials

- You will get the corresponding presentation materials before a class.

Exam

- Your final score consists of three parts.
 - Class discussion and participation 20%
 - Labs 30%
 - Project 50%
 - Written exam (optional)

Acknowledgments

- Large portion of slides and example codes of presentations are borrowed from Sang Shin's Java Passion.
